DETAILED ACTION

Allowable Subject Matter

1. Per discussion with Mr. Robert Irvine in interview held May 6, 2005, Examiner will clarify reasons for allowance to include allowed limitations combined with other limitations of claims were not found in prior art of record.
2. Claims 1-7, 12-17, and 28-45 are allowed. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record, in single or in combination, does not disclose the following limitations of claims in combination with other limitations of claims. Recognizing substantial variance in signal to noise ratio, ascertaining whether variance is consistent over a given number of transmission cycles and determining new parameters associated with variance and negotiating the use of new parameters in upstream channel, measuring a payload size for a selection of data transmissions on upstream channel, recognizing substantial variance in payload size and ascertaining whether variance is consistent over a given number of transmission cycles and determining new parameters associated with variance and negotiating the use of new parameters in upstream channel, recognizing a substantial variance in measured packet error ratio without a corresponding change in signal-to-noise ratio or payload size for a selection of data transmissions, adjusting a Forward Error Correction level of data transmission to compensate for variance.
